What To Do After You've Been Hit

Using the S.A.F.E Method after an accident will keep you safe and help your case.

1. **Seek** medical attention: The most important thing after an accident is to seek medical attention, even if your injuries are minor or don't immediately appear serious. You may not notice your injuries right away, and some can even be hidden. It's always better to get checked out immediately after any accident.
2. **Alert** the police: You will want to call 911 from the scene of the accident. Also tell them if you need an ambulance. The police will determine liability and maybe even issue a ticket to the at fault driver. This will be very strong evidence and it is good for your case.
3. **Find** safety: Move all vehicles and people to a safe, well lit area nearby if it can be done safely and without injury. All parties can exchange information and wait on the police/ambulance/EMS in the safe area.
4. **Evidence** gathering: You'll want to gather as much evidence as you can. This will add value to your claim, establish your damages and show the accident scene. Things like Pictures, videos, statements, & witness contact information will help make our case stronger.

If you've been in an accident we can help get you the medical treatment you need, the piece of mind you want and the compensation you deserve. Call The Hedman Firm now **281-205-8180**.
